

How to Set Up 13.3" Spectra 6 System Using eJump Evaluation Kit

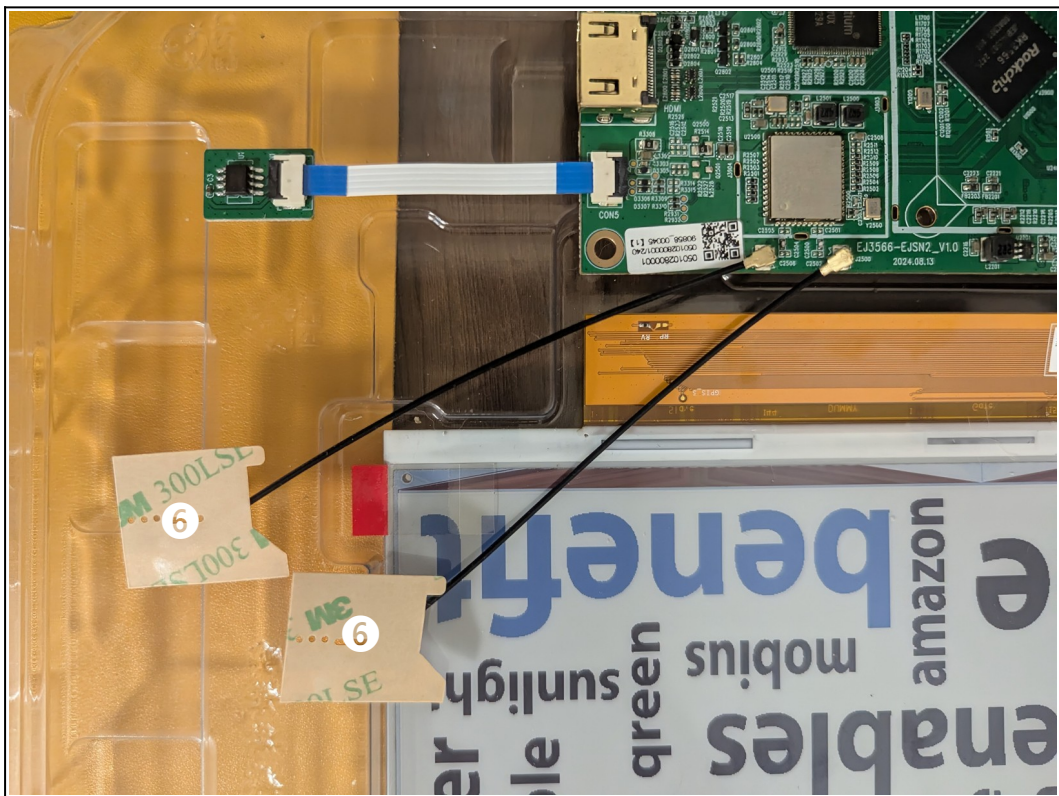

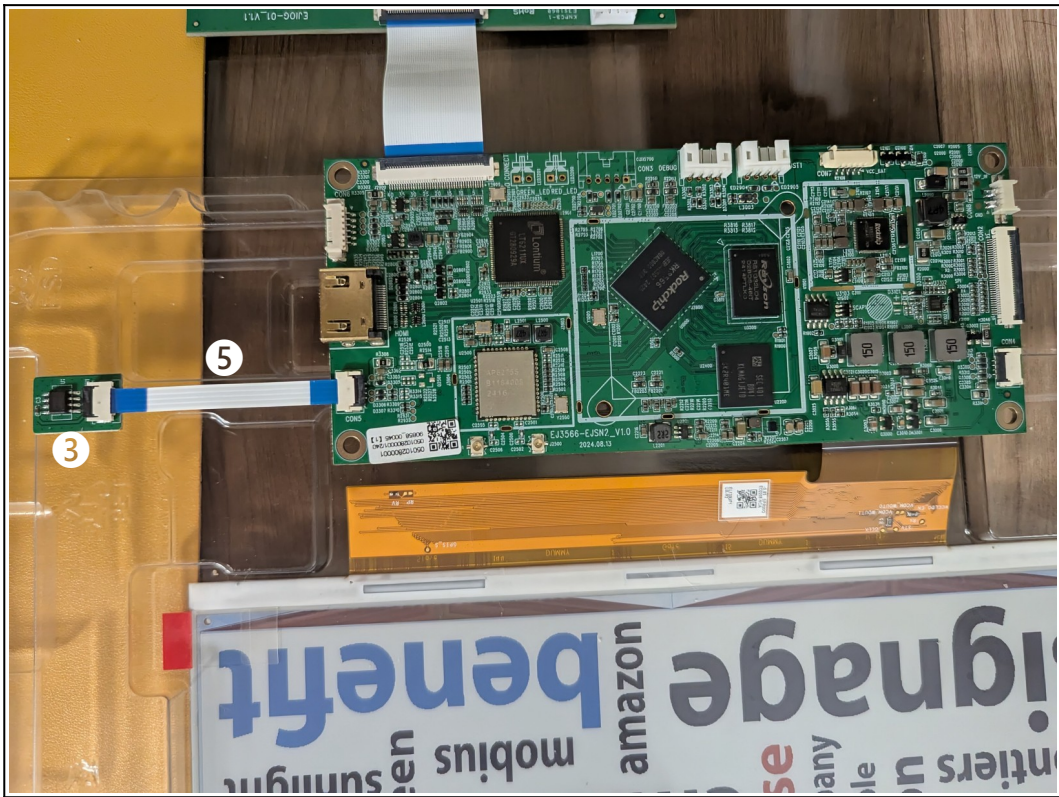

Issue Date: 2024/10/30

1. Component List of 13.3" Spectra 6 Evaluation Kit

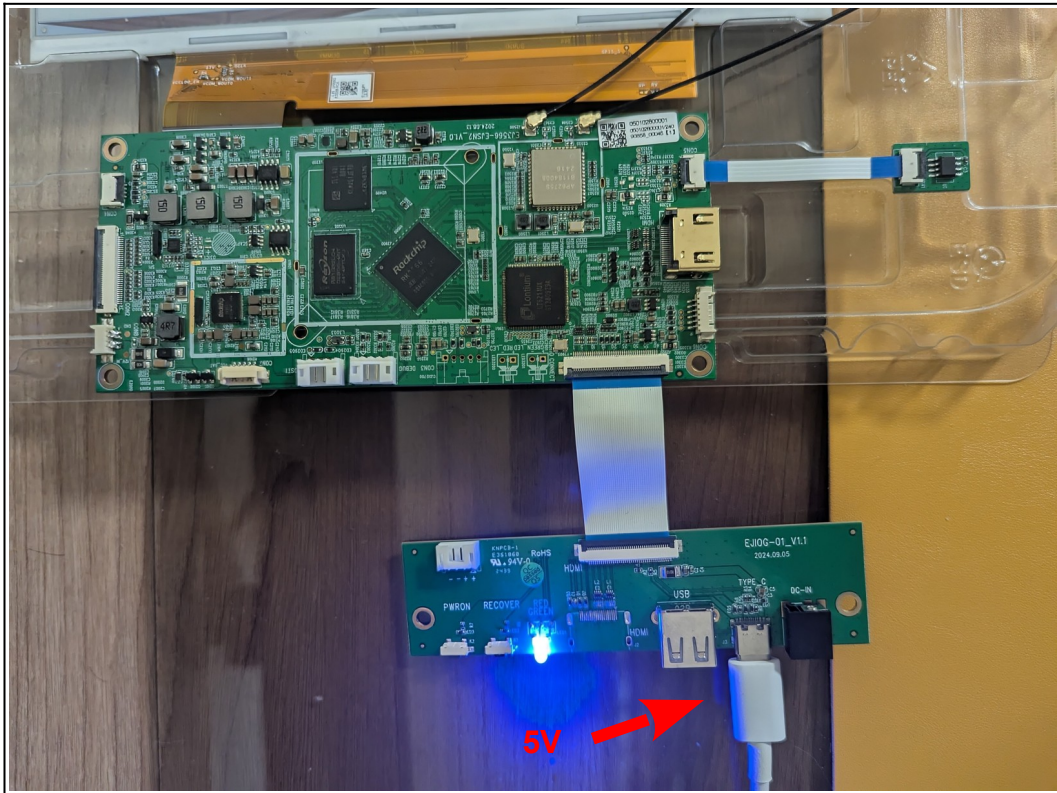

2. Installation Steps

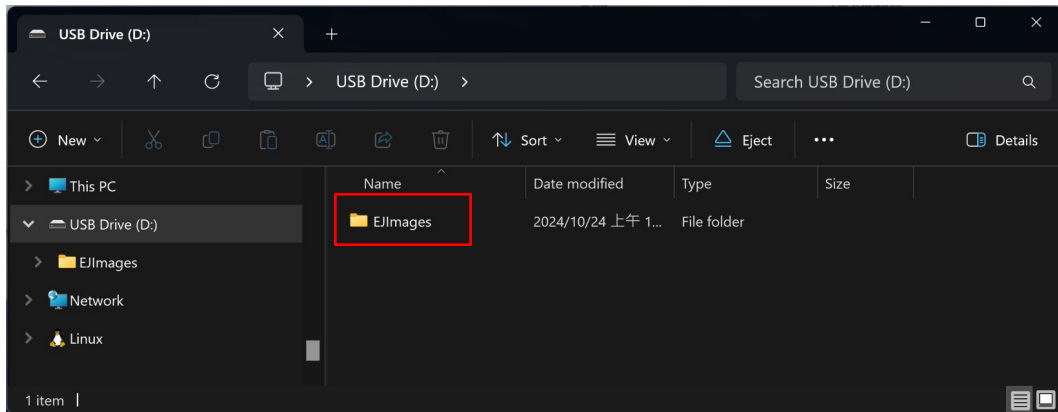

3. Operation

Warning: The power supply cable should only offer charge function but no data transfer. Otherwise type-A USB will not work, and it means you could not change the pictures by USB flash drive.

4. Change of Pictures

a. Prepare a USB flash drive, and create a folder 'EJImages' in the root directory

b. Copy all the pictures to the folder 'EJImages' and insert the flash drive to USB port of IO board

c. The device will copy all the pictures to internal memory of control board and replace the old pictures. Then the device will start the slide show with these new pictures.
