## **Precautions**

PC56H19 V2 Product Specification

#### Safety Precautions

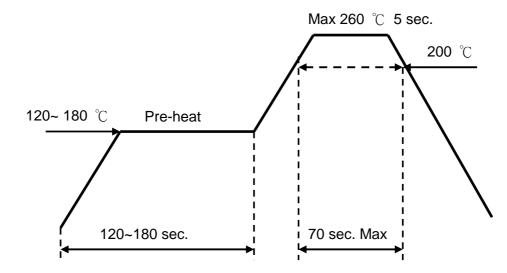

- The LED light output is too strong for human eyes without shield. Prevent eye contact directly more than seconds.
- Ensure operating under maximum rating.

#### Storage

- Before opening the package, the LEDs should storage under 30 °C, 60% RH.
- After opening the package bag, the LEDs should be keep under 30°C, 60% RH.
  Recommend to use within 168 hrs. If unused LEDs remain, suggest to store into moisture proof bag or original package bag with moisture absorbent material such as silica gel. Reseal well is necessary.
- If the product exceeded the storage period or the moisture absorbent material faded away, baking treatment should be done by following conditions.
   Bake condition: 60°C, 12hours (One time only).

#### Soldering Notice and Conditions

- When soldering LEDs,
- Do not solder/reflow the same LED over two times.
- Recommend soldering conditions: Hand soldering: 350 °C max , 3 sec. max.
   Reflow soldering: Pre-heat 180 °C max , 180 sec. max.
   Peak 260 °C max , 5 sec. max.
- Reflow temperature profile as below: (lead-free solder)

- When soldering, don't put stress on the LEDs
- After LEDs have been soldered, strongly recommend not to repair to keep the LEDs performance.

#### Static Electricity
